

indra mani mishra

full stack developer

Summary

I am a Full Stack Developer with a Bachelor's degree in Computer Applications (BCA). I have good knowledge of both front-end and back-end development. I work with technologies like React.js, Node.js, Express.js, and MongoDB to build modern web applications. I enjoy creating clean, user-friendly websites and writing efficient code. I also have experience in building secure login systems and working with APIs. I always try to learn new technologies and improve my skills. I want to work on real-world projects that solve problems and help people. I am looking for a job where I can grow as a developer and contribute to a good team.

Projects

Mynta Clone Built using React.js, Node.js, Express.js, Tailwind CSS, and MongoDB. Deployed on AWS. ► A full-featured e-commerce web app inspired by Mynta, with user authentication, product listing, cart, and checkout functionality.

Amazon Clone Developed a scalable Amazon-like e-commerce platform with React.js and Node.js. ► Includes features like product filters, user login, payment integration, and order management.

Custom E-commerce Website for a Client Designed and built a complete e-commerce solution for a customer using the MERN stack (MongoDB, Express.js, React.js, Node.js). ► Features include product management, admin dashboard, secure checkout, and responsive UI with Tailwind CSS.
